

Graduate College

UA is the leading public research university in the American Southwest

The University of Arizona offers extensive opportunities to pursue graduate degrees in more than one hundred different fields. UA is a premier, student-centered research institution. Established in 1885 as the first university in the Arizona Territory and the state's only land grant institution, the UA embraces its threefold mission of excellence in teaching, research and public service.

Now in its second century of service to the state, the UA has become one of the nation's top 20 public research institutions. The University is one of only 62 members in the Association of American Universities, a prestigious organization that recognizes universities with exceptionally strong research and academic programs.

With world-class faculty in fields as diverse as astronomy, plant science, biomedical science, business, law, music and dance, The University of Arizona offers a rewarding educational experience to all who choose to focus on excellence.

U.S. News & World Report places The University of Arizona in a tie for 45th among public national universities in **America's Best Colleges 2009** and UA is ranked No. 23 in research and development expenditures among public and private universities and colleges by the **National Science Foundation**.

The Graduate College Diversity Programs Office leads initiatives in recruiting, funding, and graduating a diverse student body at UA. Contact us today for information about how to continue your academic journey!

Students from underrepresented backgrounds represent 29% of the UA student body and 22% of graduate students.
