General Funding Opportunities

American Council on Germany's Fellowship Programs
Roughly 35 Americans and Germans travel each year through four distinct American Council on Germany (ACG) fellowships, gaining a better understanding of how issues are approached on the other side of the Atlantic and forging lasting connections with their transatlantic counterparts and fellowship alumni alike. Two fellowship programs enable journalists to explore issues of common concern for Americans and Europeans in depth while broadening their personal and professional perspectives overseas. The ACG also supports the work of promising American scholars who are studying important elements of the transatlantic relationship from both historical and contemporary standpoints. Other mid-career professionals in the fields of agriculture, environmental policy, and urban affairs are enabled to draw upon the local expertise of their transatlantic counterparts and cull best practices overseas. Each of the ACG’s fellowships provides fellows with a per diem stipend of $200 for up to 21 days; transatlantic airfare and approved inter-city travel are also covered.
Citizenship: U.S. or German
Deadline: see website for individual deadlines

German Federal Environmental Foundation/ Deutsche Bundesstiftung Umwelt (DBU) – Doctoral Scholarship Program
The DBU grants dissertation fellowships each year, for individuals in all disciplines, for advanced research work in the field of environmental protection. The work has to be done mainly in Germany, with a clear reference to the German environmental situation. The chosen topic is expected to be of high relevance and should contribute to solving problems in environmental and conservation efforts. Generally, all environmental issues are welcome who meet the above-mentioned criteria, i.e. in addition to the natural sciences and engineering, also applications from the social sciences, humanities, economics and law. Interdisciplinary topics that support a sustainable development, are especially welcome. The complexity of environmental problems requires interdisciplinary collaboration between different scientific disciplines. Therefore, DBU would like to support individuals with its scholarship programme with as many different environmental issues and in various fields. 60 fellowships are awarded each year. Projects are expected to be completed in a period of up to three years. An individual may not yet have started the doctoral thesis. DBU expects good skills of German from foreign applicants to allow their integration into the DBU scholars' network.

Postdoctoral Opportunities

Alcohol Research Group – Public Health
The Alcohol Research Group postdoctoral training program is oriented toward the pursuit of alcohol-related social science, health services, and epidemiological research. We accept applications for our postdoctoral fellowship on a rolling basis. The postdoctoral fellowship offers the opportunity to work with leaders in the field and can be a critical stepping stone toward becoming an independent investigator in addictions research.
The postdoctoral training program is appropriate for:
• Recent doctoral graduates wishing to increase their research experience and establish a publication record in alcohol studies.
• Established researchers seeking to make a transition to the alcohol studies field.
Scholars who are new to alcohol studies are welcome to apply. Recent doctoral graduates are eligible if they are seeking a transition from related fields of study or if they are continuing previous study in the field. Established faculty are eligible if they have not previously conducted research in alcohol studies.
Citizenship: U.S. citizens or permanent residents
Deadline: rolling
