Dear Graduate Students,

One of the challenges in writing the GradFunding Newsletter is trying to categorize the opportunities. For example, the Policy Hub is open to students in STEM. And although the name of the Mathematical Policy Research Fellowships indicates they should be in the STEM section, they are looking for fellows from a broad range of disciplines. In short, you may want to skim the entire list of fellowships to see if something pertains to you!

Writing Efficiency Sessions (WES)
If you are working on an intensive writing project like a dissertation, thesis, journal article, or grant proposal and you would like to increase your writing productivity, consider joining Writing Efficiency Sessions. WES is hosted by the Graduate Center, Postdoctoral Affairs, and the Think Tank Writing Center. They are free to attend and can help you move ahead on your writing projects. The atmosphere is a structured, yet laid back group writing space. You may attend an entire session or part of each three-hour session. The first two hours of each session consist of timed writing sprints with short breaks followed by a short discussion aimed at helping you improve your writing productivity. The last hour is unstructured writing time. Writing Consultants are available for consultation during the last half of the sessions.
• **Registration:** Wednesday sessions (https://uarizona.co1.qualtrics.com/jfe/form/SV_6gR8celia28pWh8); Friday sessions (https://uarizona.co1.qualtrics.com/jfe/form/SV_6gR8celia28pWh8)

### Aspen Tech Policy Hub Fellowship

The Aspen Tech Policy Hub Fellowship is a full-time program that takes tech experts and teaches them the policy process through an in-residence fellowship in the Bay Area. The Aspen Tech Policy Hub Fellowship is a 10-week, full-time, paid, in-residence program in the Bay Area that teaches technology experts the policy process. The program is ideal for technologists interested in building better tech policy, whether that be within government or more broadly as an external advocate or from within the tech industry. It is particularly well-suited to applicants who have existing tech policy ideas they wish to refine and press forward. Admitted applicants receive an $18,000 stipend to enable their participation. While the Hub fellowship is normally full-time and in-person, due to the COVID-19 pandemic, any Fellowship program we hold is likely to be a mix of in-person and online programming until a vaccine is widely available.

### Cooper Center for Environmental Learning (CCEL) & Partners for Equitable Science Instruction (PESI) Observing Nature Teacher Workshop Series

Nature journals are a place to generate, expand, document, and explore observations, ideas, and reflections. They can help students create, test and refine their understanding of scientific explanations of the natural world. Nature journaling requires no special
artistic talents and no special scientific knowledge, just a desire to slow down, look carefully, question, and wonder. In this four-part online workshop, participants will be introduced to basic drawing techniques, ideas for recording observations, and possibilities for extending journals into deeper explorations across multiple genres and disciplines. We’ll spend time discussing how nature journals provide opportunities for science learning during this period of virtual education and how they allow the process of inquiry to flourish for students of any age, and for any topic learners might pursue. Teachers will receive a $150 stipend for participation in all four sessions. Stipend will be awarded after the final session. This workshop consists of four 90-minute Zoom sessions. All sessions will take place over Zoom on the following dates:

- Tuesday, February 9th, 4pm - 5:30pm
- Tuesday, February 16th, 4pm - 5:30pm
- Tuesday, March 2nd, 4pm - 5:30pm

**FUNDING OPPORTUNITIES IN THE ARTS, HUMANITIES, & SOCIAL SCIENCES**

**AccessLex Institute Legal Education Diversity Pipeline Grant Program**
The Diversity Pipeline Research Grant Program provides funding to programs and initiatives aimed at helping college students and/or college graduates from historically underrepresented groups successfully matriculate into law school and the legal profession. The central goal of the grant is to increase the knowledge base around effective methods for increasing the enrollment and success of law students from historically underrepresented racial and socioeconomic backgrounds. Accordingly, we seek to fund collaborative programs that provide participants with meaningful content and experiences as well as holistic support. Funded programs must engage in rigorous program evaluation, systematically measuring outcomes and identifying scalable best practices.

**Arizona Commission on the Arts Voices of the Wilderness Alaskan Artist-in-Residence Program**
The Voices of the Wilderness artist residency is a unique opportunity. It is modeled after traditional residencies in the national parks... with a twist. Instead of staying at a remote wilderness cabin, our participating artists are paired with a wilderness specialist and actively engaged in stewardship projects, such as research, monitoring, and education. The idea is to give artists a sense of the stewardship behind America’s public lands, fostering an artistic exploration of these natural and cultural treasures. The hoped-for result is artwork that communicates something of the meaning of these lands. In the summer of 2021 artists will be invited to participate in our residencies, each opportunity completely different. The purpose is to share with the community artwork that conveys the inspirational and other values of wilderness.

History Colorado Women’s History Fall Fellowship

History Colorado is seeking three recipients for its Center for Colorado Women’s History Fall Fellowship. We invite scholars, activists, artists, musicians and writers who are engaged in the expansion and expression of knowledge to help inform the understanding of women in Colorado’s history, specifically through the interdisciplinary lens and methodologies of women’s studies, gender studies, and/or race and ethnic studies. Scholars, activists, artists, musicians, and/or writers will focus on the generation of knowledge and/or the expression of history within the scope of the interdisciplinary fields of women’s studies, gender studies and ethnic studies. Participants will help to inform the narrative of women’s history at the Center for Colorado Women’s History and contribute to the greater understanding of the history of women in Colorado. Successful candidates will be willing to engage in museum and community events such as exhibits, arts projects, programs, and collaborations with other History Colorado properties and sites.

Houston Center for Contemporary Craft Residency Program

Applicants must be able to fulfill a program requirement of working in their studios for two days per week during HCCC public hours. All resident artists are required to open their studios to public interaction on Saturdays and one other day of the week (TBD), as well as during exhibition openings and specific educational programs on the evenings and weekends. Media accepted includes wood, glass, metal, fiber, clay, and mixed media. Applicants should consider the public-facing nature of the residencies and the fact that a major goal of the program is to provide visitors with an opportunity to explore contemporary craft through engaging with working artists. Benefits of the residency include 24/7 access to studio space, cultural and professional development opportunities, a monthly stipend that includes a small housing/materials allowance, and the opportunity to give an artist talk.
Kerouac Project Residencies for Writers

The Kerouac Project provides four residencies a year to writers of any stripe or age, living anywhere in the world. In the past we have accepted writers with no formal writing education alongside those with MFA’s and impressive résumés. You will be judged on the quality of the writing sample you submit. Each residency consists of approximately a three month stay in the cottage where Jack Kerouac wrote his novel Dharma Bums. Utilities and a food stipend of $1,000 are included. As writer-in-residence, all you are required to do is live in the Kerouac House during your residency, work on your writing project, and participate in three events—a Welcome Potluck dinner for you; a Final Reading of your work at the Kerouac House at the end of your residency; and give a public reading at Valencia College. Should you desire them, the Kerouac Project can also offer opportunities for you to participate in other readings, lead workshops, and interact in other ways with the vibrant Central Florida literary community.

**U.S. Capitol Historical Society**
Inaugurated in 1986, the Capitol Fellowship Program has provided financial support to more than fifty scholars researching important topics in the art and architectural history of the United States Capitol Complex. The proposed topic must directly relate to some elements of art or architecture within the United States Capitol complex: the Capitol, the congressional office buildings, the Library of Congress buildings, the Supreme Court buildings, and the Botanic Garden. It may include studies of individual artists, architects, or other historical figures and forces. The research must involve the resources of the Architect of the Capitol, including the architectural drawings, manuscripts, and reference collections, or material on the Capitol in the Library of Congress, National Archives, or other specific collections identified in the applicant’s proposal.
**W. Eugene Smith Memorial Fund Howard Chapnick Grant**

In 1996 the W. Eugene Smith Memorial Fund established the Howard Chapnick Grant, to encourage and support leadership in fields ancillary to photojournalism, such as editing, research, education and management. The annual $10,000 grant may be used to finance any of a range of qualified undertakings, which might include a program of further education, research, a special long-term sabbatical project, or an internship to work with a noteworthy group or individual. According to the Fund’s Board of Trustees, special consideration will be given to individuals, initiatives, organizations or projects that promote social change and/or serve significant concerns of photojournalism. This grant is not intended to be used for the creation or production of photographs, which will continue to be funded by the Smith Fund Grant and the Smith Fund Student Grant.

**FUNDING OPPORTUNITIES IN SCIENCE & ENGINEERING**

**AFCEA Ralph W. Shrader Graduate Diversity Scholarship**

AFCEA’s focus is on STEM/hard sciences - information technology, cybersecurity, telecommunications electronics supporting defense, homeland security and intelligence communities. For the 2021-2022 academic year scholarships of $3,000 will be awarded to full-time students (women and minority students), enrolled in their second semester and at least two semester-equivalent courses) currently pursuing a graduate degree at any accredited academic institution in the United States and living in the United States in an eligible major that supports the mission of AFCEA Educational Foundation. Expected graduation date cannot be in the year the scholarship is awarded.

**Argonne National Laboratory Graduate Research Program**

Graduate Research Program (GRP) appointments are available to qualified U.S. and non-U.S. university graduate students who wish to carry out their thesis research at Argonne National Laboratory under the co-sponsorship of an Argonne staff member and a faculty member at the student’s home institution. This program provides Master’s and Ph.D. level candidates an opportunity to conduct work within an Argonne research
group or on a specific project for the purpose of supporting the student’s thesis work. The university sets the academic standards and awards the degree. In practice, the participation of the faculty member varies from full partnership in the research to general supervision of the student’s thesis work. The Argonne staff member keeps the faculty member at the university informed on the student’s progress.

**Danone Yogurt, Probiotics and the Gut Microbiome Fellowship Grant**

Danone North America, PBC will award $25,000 to two graduate students interested in exploring the gut microbiome, probiotics and yogurt to better understand how they help support and maintain human health and wellness. Since its inception, the Danone North America, Fellowship Grant has enabled up-and-coming scientists to make strides in the interdisciplinary fields of biology, health sciences, nutrition, microbiome, yogurt and probiotics. Applicants should excel in science and have an interest in studying the gut microbiome, probiotics and yogurt in human health and wellness (the "Field"); and are encouraged to submit a proposal for a study that explores measures of human health and wellness. The grant is not designed for the investigation of disease treatment or clinical management and should focus on health and wellness, long-term health and longevity, growth and development, or performance.

**Department of Energy (DOE) Solar Energy Innovators Fellowship**

The Energy Efficiency and Renewable Energy (EERE) Research Participation Program is designed to provide opportunities for students, postgraduates, established scientists and faculty to participate in programs, projects, and activities that support the mission of the EERE. Participants will hold appointments at DOE-EERE Headquarters, EERE field offices, and other EERE-approved sites. The purpose of the Solar Energy Innovators Program is to enable selected applicants to conduct practical research on innovative solutions to the challenges faced by electric utilities, energy service providers, and electric public utility commissions as the levels of solar energy, as well as other distributed energy resources (DERs), increase on the electrical grid. ORISE is continuing normal program operations during the COVID-19 pandemic. This opportunity will be offered as long as Host Institution is able to complete the onboarding process and ensure a meaningful experience to participants.

Harvard-Smithsonian Center for Astrophysics

Smithsonian Astrophysical Observatory (SAO) brings together scientists for research in astrophysics and related fields. Applicants in theory, observation, instrument development, or laboratory experiments at a university or college are strongly encouraged to apply to this program. The program is designed for graduate students wishing to carry out all or part of their thesis research at the Smithsonian Astrophysical Observatory. Therefore, applicants must have completed preliminary coursework and examinations prior to the start of the SAO Predoctoral Program. The SAO Predoctoral Fellowship is awarded for a period of six months or more dependent on the project. It is possible to renew or extend a SAO Predoctoral Fellowship Award based on the availability of funding, satisfactory progress, and the agreement of both the home institution advisor and the SAO advisor.

- **Deadline:** Rolling, but all applications must be submitted at least six weeks prior to the intended appointment start date.
- **Citizenship:** The SAO issues only J-1 visas to fellowship recipients.
Idaho National Laboratory (INL) Graduate Internships
Graduate internships at INL offer a great opportunity to explore research topics. Internships are primarily awarded to qualified masters and doctoral degree candidates in science, technology, engineering and mathematics (STEM) fields. Qualified candidates in other areas, however, are also considered. INL’s internship terms are designed to match a typical university term, lasting anywhere from 10 to 16 weeks. Summer interns should come to INL expecting to work 40 hours. There is, however, flexibility within that 40-hour workweek to assist interns with scheduling conflicts, if needed. INL interns are paid a nationally competitive wage that is based on the number of credits they have earned and degree program they are enrolled in.

Neuroscience Scholars Program (graduate and postdocs)
The Neuroscience Scholars Program (NSP) is a two-year online training program open to underrepresented graduate students and postdoctoral researchers. Building on a 30 year history, NSP provides resources focused on career advancement issues, the research process, and cutting-edge scientific content. NSP participants have access to live events and webinars, educational resources an online group for those seeking career connections, and guidance from mentors and NSP Alumni. The Neuroscience Scholars Program is comprised of two opportunities: NSP Fellows and NSP Associates. Up to 18 applicants will be selected for the NSP Fellows Program. Highlights include: Two years of complimentary SfN membership; Travel award to attend the SfN annual meeting each fall during the two-year program; Up to $1,500 in enrichment funds to support allowed professional development activities; and A mentoring team consisting of a senior mentor and a member of the Neuroscience Scholars Program Subcommittee. The team will discuss a fellow's research, career plans, and overall experience. All eligible applicants will be invited to become NSP Associates, including those selected as NSP Fellows. Features of the NSP Associates Program include: An online diversity affinity group of NSP mentors and alumni for seeking career connections and guidance;
Webinars and resources that focus on career advancement issues, topics related to the research process, and cutting-edge scientific content; An invitation to present research at the Diversity Poster Session and attend the Diversity Reception at the annual meeting; and The opportunity to receive a professional development award to support travel to the SfN meeting during their second year in the program.

Worldwide, ~370 million indigenous people live in over 90 countries. Although, indigenous people are only approximately 5% of the world population, they represent 90% of cultural diversity and hold 20% of the land that maintains 80% of the world’s remaining biodiversity. However, indigenous people often lack access to energy, water, and food infrastructure. Indige-FEWSS’s goal is to develop a diverse workforce with intercultural awareness and FEWS expertise to address FEWS challenges in indigenous communities. Indige-FEWSS believes developing technical solutions to these challenges requires an understanding of indigenous societies, governance, and culture and the ability to work effectively in these contexts.

### POSTDOCTORAL OPPORTUNITIES

#### APHL-CDC Infectious Diseases Bioinformatics Fellowship (graduates and postdocs)

The APHL-CDC Bioinformatics Fellowship aims to train and prepare bioinformaticians to apply their expertise within public health and design tools to aid existing public health personnel in the use of bioinformatics. The Bioinformatics Fellowships provide post-master’s and post-doctoral level professionals the opportunity to apply their skills to a range of important and emerging public health problems while gaining experience in their fields. The program is a one-year full-time working fellowship for master's- and doctoral- level bioinformaticians. Postdoctoral fellows may extend for an additional year, provided funding is available. Fellows are placed in state, local and federal (CDC) public health laboratories throughout the US and collaborate on a wide range of important and emerging public health problems. All fellows participate in an orientation session. Once in their host laboratories, fellows are supervised by an experienced mentor and work on real-world infectious disease projects. Fellows will collaborate with public health laboratorians, epidemiologists and other subject matter experts to synthesize and correlate data into actionable public health information as part of ongoing AMD projects. In addition to their project-specific work, fellows will participate in distance-based training and learning activities to achieve proficiency in select public health laboratory core competencies.

**de Duve Institute Post-Doctoral Program in Belgium**

The de Duve Institute is on the list of institutions recognized by the Belgian government to be eligible for tax-exempt prizes and subsidies. The Institute awards 1-year fellowships, which are renewable once, to young scientists who in principle have not obtained their PhD degree at a Belgian University and who wish to carry out their post-doctoral research within one of our research groups. Candidates must hold a PhD or MD degree, and must be in a situation of “international mobility”, i.e. they should in principle not have resided or carried out their main activity (work, studies, etc.) in Belgium for more than 12 months in the 3-year period before submission of their application for a de Duve Institute fellowship.

**Damon Runyon Cancer Research Foundation Fellowship Award**

The Foundation encourages all theoretical and experimental research relevant to the study of cancer and the search for cancer causes, mechanisms, therapies and prevention. Candidates must apply for the fellowship under the guidance of a Sponsor—a scientist (tenured, tenure-track or equivalent position) capable of providing mentorship to the Fellow. In addition to aiding in the planning, execution and supervision of the proposed research, the Sponsor’s role is to foster the development of the Fellow’s overall knowledge, technical and analytical skills, and capacity for scientific inquiry. The Sponsor is also expected to assist the Fellow in attaining his/her career goals.

**Experimental Psychology Society (EPS) Grants for Study Visits**

This scheme aims to help finance postgraduate and postdoctoral research in experimental psychology. Awards will pay for travel to and accommodation at another institution outside an individual’s academic base. The purpose of the visit is to develop the applicant’s research skills, and may involve learning at first hand about experimental procedures employed in the host laboratory, or designing and running studies that cannot already be carried out in the applicant’s home department. Awards will not be granted for work which forms an integral part of an existing Ph.D research project, nor for work which would normally be funded by other bodies (e.g. the applicant’s award-granting body or home institution). To apply for an EPS Study Visit, either the researcher’s home institution or the institution to be visited, or both, must be in the UK.

- *Deadline:* March 1, June 1, September 1, December 1
Hunt Postdoctoral Fellowship

Hunt Postdoctoral Fellowships (writing) provide up to $40,000 towards the writing-up of already completed research. The fellowship is awarded to early career scholars, who frequently lack the time and resources they need to publish their work. Applicants should be no more than ten years beyond their PhD, with allowances made for periods of caregiving, and have a doctorate in anthropology or an equivalent field. A maximum of eight Hunt Postdoctoral Fellowships are awarded annually. By providing funds for scholars to devote themselves full-time to writing, the Foundation aims to enable a new generation of scholars to publish significant works that will impact the development of anthropology. The program contributes to the Foundation's overall mission to support basic research in anthropology and to ensure that the discipline continues to be a source of vibrant and significant work that furthers our understanding of humanity's cultural and biological origins, development, and variation. The Foundation supports research that demonstrates a clear link to anthropological theory and debates, and promises to make a solid contribution to advancing these ideas. There is no preference for any methodology, research location, or subfield. The Foundation particularly welcomes proposals that employ a comparative perspective, can generate innovative approaches or ideas, and/or integrate two or more subfields.

Japan Society for the Promotion of Science (JSPS), the JSPS–UNU Postdoctoral Fellowship Programme

Jointly organised by the United Nations University and the Japan Society for the Promotion of Science (JSPS), the JSPS–UNU Postdoctoral Fellowship Programme is designed to provide promising, highly qualified, young researchers with the opportunity to conduct advanced research in sustainability in co-operation with host researchers at Japanese universities and research institutions. This fellowship is aimed at candidates who have completed their doctorates in the past six years and also have professional and/or research experience. Under this programme fellows conduct research relevant to one or more of the main thematic focus areas of UNU-IAS: sustainable societies, natural capital & biodiversity, and global change & resilience. Research proposals for JSPS–UNU Postdoctoral Fellowships should relate clearly to one of the specific research areas outlined by UNU-IAS. The proposed research must be policy-relevant and incorporate gender issues within the research agenda: Water and Resource Management; Innovation and Education; Biodiversity and Society; and Strategic Programme.

National Aeronautics & Space Administration (NASA) Postdoctoral Fellowship
The NASA Postdoctoral Program (NPP) provides early-career and more senior scientists the opportunity to share in NASA's mission, to reach for new heights and reveal the unknown so that what we do and learn will benefit all humankind. NASA Postdoctoral Fellows work on 1 to 3 year assignments with NASA scientists and engineers at NASA centers and institutes to advance NASA's missions in earth science, heliophysics, planetary science, astrophysics, space bioscience, aeronautics, engineering, human exploration and space operations, astrobiology, and science management. NASA Postdoctoral Program Fellows contribute to our national scientific exploration, confirm NASA's leadership in fundamental research, and complement the efforts of NASA's partners in the national science community.

Ruth L. Kirschstein Postdoctoral Individual National Research Service Award
The National Institutes of Health (NIH) offers up to 3 years of fellowship support for postdoctoral scholars interested in biomedical and behavioral research. The purpose of the Ruth L. Kirschstein National Research Service Award (NRSA) Postdoctoral Fellowship is to enhance the research training of promising postdoctoral candidates who have the potential to become productive, independent investigators in scientific health-related research fields relevant to the missions of the participating NIH Institutes and Centers. Awards are made to individual applicants for specific training proposals. The scholarship is named after Dr. Ruth L. Kirschstein. Aside from Dr. Kirschstein's scientific accomplishments in polio vaccine development, and becoming the first woman director of an NIH Institute, she was a champion of research training and a strong advocate for the inclusion of underrepresented individuals in the scientific workforce.

Sci-Founder Fellowship (PhD graduates and postdocs)
The Sci-Founder Fellowship program will help scientists create a startup company of their own, invest $400,000 per company, and mentor the founders. The ultimate goal is to get the teams to a stage where they can raise seed funding from investors on their own (we will introduce them to investors from our network). Sci-Founder will take equity in the formed entity but no ownership of any intellectual property. The IP will
stay with the inventor/institution and is normally licensed from the institution to the formed company. We are not planning to go through a lengthy application process that involves business plan or pitch competitions, and the involvement of external mentors. We want to help scientists to get started right away to work on their ideas by offering sufficient start capital and hands on mentorship on how to build their company the right way.

**Zuckerman Postdoctoral Scholars Program**

The Zuckerman Postdoctoral Scholars Program attracts high-achieving postdoctoral scholars from premier universities in the United States and Canada to do research at one of seven Israeli universities. Once they complete their research, many Zuckerman postdocs are expected to accept faculty positions at top North American universities, weaving a network of academic collaboration and goodwill that will greatly benefit US-Israeli scientific cooperation. Zuckerman Scholars enjoy unique programming and activities organized especially for them by their host universities and the Zuckerman Institute in Israel, including touring, educational experiences, and social programs. These activities are designed to strengthen the scholars’ knowledge of and connection to Israel, and cultivate an esprit de corps, exchange of ideas, and foster new relationships. Five postdoctoral scholarships will be given out per participating university for the 2021-2022 academic year in two tracks: Postdoc at an Israeli University Track, a two-year postdoctoral scholarship where scholars conduct research exclusively at one of 7 participating Israeli universities; and Joint US-Israel Postdoc Track, a two-year joint postdoctoral scholarship where scholars spend half their time at one of 7 participating Israeli universities, and the other half at a US or Canadian university.

- **Deadline:** March 31, 2021
- **Citizenship:** Must be citizens of the United States or Canada or have a documented status that allows them to study and work in the US.
