Information Sessions

DAAD – German Academic Exchange Service Study Scholarship and Research Fellowship Information Session

DAAD Fellowships provide support for study in Germany. The following opportunities through DAAD are generally most relevant for graduate students: study scholarships (provide an opportunity to do independent study in Germany or to complete a full Master’s degree), research grants (primarily to do doctoral research). As a partner university, DAAD encourages the UA to select one priority candidate. Priority candidates from partner universities receive preferential status in the general fellowship competitions and have a considerably higher likelihood of being selected. The information session will cover the basics of the study scholarship and research scholarships as well as the priority candidacy process.

### General Funding Opportunities

#### American Educational Research Association (AERA) Dissertation Grants
With support from the National Science Foundation (NSF), the AERA Grants Program announces its Dissertation Grants competition. The aim of the program is to advance fundamental knowledge of relevance to STEM policy, foster significant science using education data, and build research capacity in education and learning. The program seeks to stimulate research on U.S. education issues using data from the large-scale, national and international data sets supported by the National Center for Education Statistics (NCES), NSF, and other federal agencies, and to increase the number of
education researchers using these data sets. The program supports research projects that are quantitative in nature, include the analysis of existing data from NCES, NSF or other federal agencies, and have U.S. education policy relevance.

**Arizona Financial Aid Trust (AFAT) Graduate Needs-based Awards**

The Graduate and Professional Student Council (GPSC) has long advocated for better resources and funding for graduate students. This year we achieved a major win by securing AFAT—Arizona Financial Aid Trust—funding for graduate students. The award amount is $3,000, and there is $800,000 of total funding available. The application cycle runs from January 8 through July 1. Eligibility criteria includes: U.S. citizen/permanent resident; completed FAFSA (priority deadline: March 1); demonstrate financial need; minimum 3.00 GPA; includes Law and Medicine but NOT online students. To apply, (1) Log in Arizona Scholarship Universe; (2) Search AFAT in top-right search bar; and (3) Click “Apply” and follow the instructions.

- **Deadline:** July 1, 2020 (priority deadline)
- **Citizenship:** U.S. citizen or permanent resident

**DAAD (German Academic Exchange Service) Short Term Research Grants**

Short-Term Research Grants are awarded for 1-6 months to highly qualified candidates who have completed a Master’s degree or Diploma, or in exceptional cases a Bachelor’s degree at the latest by the time they begin their grant supported research, or those who have already completed a PhD (postdocs). DAAD will cover health insurance and provide a flat rate subsidy for travel costs. In addition, limited funds are available for a rent subsidy and family allowance.

- **Deadline:** May 1, 2020
- **Citizenship:** U.S. or Canadian citizens or permanent residents. Foreign nationals who live in the U.S. or in Canada must have been living in the U.S./Canada for a minimum of one year and have their current residence in the U.S./Canada by the time of the application deadline.

**Graduate & Professional Student Council (GPSC) Professional Opportunities Development (POD) Funding**

The GPSC recognizes that graduate and professional student education is advanced by events promoting the development of skills necessary to succeed in their fields of study. Therefore, the GPSC strives to support professional development initiatives of graduate and professional students through Professional Opportunity Development (POD) Funding. Such initiatives and events include, but are not necessarily limited to, academic seminars, conferences, meetings with industry representatives, etc. which are occurring at the University of Arizona. Any group of at least three graduate and/or professional students can apply to the GPSC for funding to support a POD event they are directly involved in planning. The maximum award for POD Funding is $1,500 per application to be used within six (6) months of receiving funding.

- **Deadline:** It is in your organization’s best interest to apply early because it may take up to two months to receive funding.

**Laura Bassi Scholarships**

The Laura Bassi Scholarship was established by Editing Press in 2018 with the aim of providing editorial assistance to postgraduates and junior academics whose research focuses on neglected topics of study, broadly construed, within their disciplines. The scholarships are open to every discipline and are awarded three times per year: December, April, and August. The value of the scholarships are remitted through editorial assistance as follows: Master’s candidates: $750; Doctoral candidates: $2,500; Junior academics: $500. These figures reflect the upper bracket of costs of editorial assistance for master’s theses, doctoral dissertations, and academic journal articles, respectively. All currently enrolled master's and doctoral candidates are eligible to apply, as are academics in the first five years of their employment.

**NACADA: The Global Community for Academic Advising Research Support Grant for Academic Advising**
NACADA research support is intended to facilitate research related to academic advising. Quantitative, qualitative, or mixed methodologies are welcome, as is research from a variety of disciplinary perspectives. Program assessment is not funded. Successful proposals will clearly describe the development, implementation, analysis, and reporting of rigorous inquiry that investigates academic advising’s impact, context, or theoretical basis. The impact of academic advising on students and institutions, such as measurement of advising’s impact on particular student populations or on institutional goals (such as retention or program implementation) or analysis of the impact of particular advising practices, models, or organizational structures on student learning and development. The context of academic advising, which may include examination of institutional and cultural conditions that have an impact on student academic decision-making, institutional support, or reward and recognition of advising. The theoretical basis of academic advising development and practice, including evaluation or analysis of advising-based theory from philosophical/theoretical perspectives informed by a variety of disciplines.

UA Office of Societal Impacts Get the Course-based Undergraduate Research Experiences (CUREs)

The new Office of Societal Impacts under Research, Innovation & Impact (RII) and Student Engagement and Career Development (SECD) are partnering to: (1) host a free introductory workshop on course-based undergraduate research experiences (CUREs) as an approach to broadening access to undergraduate research (UR) for all fields, and (2) offer a paid opportunity for instructors to attend a CURE Training Institute and develop a CURE. This opportunity for University of Arizona instructors is funded by a Provost Investment Fund award. It provides initial incentives and training to support instructors in designing CUREs as one- or two-unit first-year seminar courses. A cohort of six selected teams will attend the University of Arizona CURE Training Institute in May or June 2020. During the Institute, participants will learn about and use evidence-based instructional strategies to develop plans, instructional materials, and assessment tools for integrating a research project into a one- or two-unit first-year seminar course. Funding of $7,000 for summer 2020 development of one- or two-unit CURE course for first-year students and implementation in fall 2020 or spring 2021. Six teams will be selected for the 2020 CURE Cohort. Instructors who are faculty, post-docs, graduate students, or staff can apply. Instructors may apply as a team and split the award.

**UA Space Grant Graduate Fellowships**
The UA/NASA Space Grant Program and nominating departments provide six graduate fellowships per year to exceptional graduate students interested in promoting the understanding of space-related research to the public and who are studying in space sciences/engineering, public policy, earth sciences, science education, and global change-related fields. Space Grant fellows are required to complete an educational outreach project as part of their fellowship. In keeping with National Space Grant College and Fellowship Program goals, Space Grant Fellows will develop a project that promotes the understanding of space-related research to the public. Successful applicants tend to establish a relationship with an organization or institution (i.e. a school, museum, park/forest, or an existing educational program) as they develop their outreach project proposal. It is essential that applicants identify an "educational outreach advisor" representing this organization or program who will provide an initial letter of support that indicates their willingness to cooperate with the applicant's proposal and help in evaluating the project during the fellowship period.

### Endangered Language Fund (ELF) Language Legacies Grant Program

The Endangered Language Fund provides grants for language documentation and revitalization, and for linguistic fieldwork. The work most likely to be funded is that which serves both the native community and the field of linguistics, although projects which have immediate applicability to one group and more distant applicability to the other will also be considered. Support for publication is a low priority, although it will be considered. Proposals can originate in any country. The language involved must be in danger of disappearing within a generation or two. Endangerment is a continuum, and the location on the continuum is one factor in our funding decisions.

- **Deadline:** March 15, 2020
- **Citizenship:** Unrestricted

### Mellon-Fronteridades Creative Scholars

The Mellon-Fronteridades Creative Scholars program seeks to expand interdisciplinary scholarship, service, and engagement with Arizona-Sonora border communities through the lens of the humanities, arts, and humanistic social sciences. This program offers a unique opportunity to amplify new voices in the border narrative and enrich public understanding of border life. Additionally, this program elevates research/projects that engage with the social and cultural resources and the complex challenges among marginalized communities in the borderlands (e.g., food security, job scarcity, migration, environmental challenges, public health, regional challenges, human security etc.). This program provides funding for students, postdoctoral scholars, professionals,
artists, and local community members passionate about enriching understanding of the US-Mexico borderlands through community-based art or social justice projects (Cohort 1) or scholarly projects (Cohort 2).

- **Deadline:** Cohort 1 applications are currently ongoing. Cohort 2 applications are due April 1, 2020.

**National Museum of African American History and Culture Internships & Fellowships Mellon-Fronteridades Creative Scholars**

Internships at the National Museum of African American History and Culture offer college and graduate students and recent graduates opportunities to work closely with professionals and scholars in the museum field. The museum provides a dynamic learning environment and access to supportive mentors that help interns reach their educational and professional goals. Interns can gain practical museum skills and program development experience in a variety of positions from education to collections to public relations. Internships will take place at the National Museum of African American History and Culture or the office space at Capital Gallery, 600 Maryland Avenue SW, accessible by Metro Yellow/Green & Blue/Orange/Silver Lines.

- **Deadline:** March 15, 2020 (Summer 2020 internship). Applicants interested in combining an internship at NMAAHC with a paid internship or award through other programs (see website for list) must submit an application by the deadline for these programs.

**NSF Cultural Anthropology Program - Doctoral Dissertation Research Improvement Grants (CA-DDRIG)**

The Cultural Anthropology Program awards Doctoral Dissertation Research Improvement Grants (DDRIGs) in all areas of cultural anthropological science supported by the Program. The primary objective of the Cultural Anthropology Program is to support basic scientific research on the causes, consequences, and complexities of human social and cultural variability. DDRIGs support the development of the next generation of cultural anthropologists to pursue those questions. CA Doctoral Dissertation Research Improvement Grants provide funds for items not usually available from the student's U.S. academic institution. The awards are not intended to provide the full costs of a student's doctoral dissertation research. Funds may be used for valid research expenses.

Sociologists for Women in Society (SWS) Esther Ngan-ling Chow and Mareyjoyce Green Scholarship
Sociologists for Women in Society has worked hard to build a coalition of women scholars who share concerns about the status of women both domestically and internationally. In keeping with that mission, SWS established a Women of Color Scholarship at its annual meeting in February 2007. The primary purposes of the scholarship are: (1) To offer support to women of color scholars who are from underrepresented groups and are studying concerns that women of color face domestically and/or internationally; and (2) To increase the network and participation of students and professionals of color in SWS and beyond. We invite applications for the 2019 Esther Ngan-ling Chow and Marejoyce Green Scholarship, formerly known as the Women of Color Dissertation Scholarship. Please see website for eligibility criteria.

**Women’s Philanthropy Institute Doctoral Dissertation Fellowship**

The WPI Doctoral Dissertation Fellowship embodies the interdisciplinary strengths of the field of philanthropic studies. Funding for additional research and dissertation writing is difficult to obtain; for emerging scholars this fellowship fills a much needed gap. The goals of the WPI Doctoral Dissertation Fellowship are to increase research and understanding of gender and philanthropy, contribute to building the field of study of gender and philanthropy, and support and encourage emerging scholars in their study of gender and philanthropy. The fellowship is for emerging scholars who focus in the area of women’s philanthropy or gender differences in philanthropic behavior. The fellowship is intended to support research and dissertation writing for those who are close to completing their dissertations.

Women’s Studio Workshop Internships and Residencies

The Women’s Studio Workshop provides the following opportunities: studio internships, art administration internship, summer internship, and ceramics internship. Since 1983, Women’s Studio Workshop’s Internship Program has been providing young artists with the opportunity to learn first-hand how women can manage productive, successful careers as professional artists. WSW interns learn techniques for developing their work, build various computer and studio-based skills, and are introduced to methods of gaining funding and exhibition opportunities. Interns also learn about the management of a renowned arts organization.

**Funding Opportunities in Science & Engineering**

**ABC Humane Wildlife Control & Prevention – Women in STEM**

As a woman-owned corporation operating in a largely male field, we understand the remarkable impact women can have. We want to pave the way for other women pursuing their dreams in the scientific world, which is why ABC Wildlife is introducing a scholarship designed to increase the number of women studying and influencing the future of science, including technology, engineering and math. This program is for individuals studying or planning to study the fields of science (excluding social sciences i.e. economics), engineering, mathematics, or technology.

**AFCEA STEM Teacher Scholarships and Diversity Graduate Scholarships**

The STEM Teacher Scholarships are competitive-based scholarships of $2,500. Each scholarship is available to students actively pursuing a graduate degree or credential/licensure for the purpose of teaching science, technology, engineering or math (STEM) subjects at a United States K-12 school. The Diversity Graduate Scholarships of $3,000 will be awarded to full-time students (women and minority
students), enrolled in their second semester and at least two semester-equivalent courses) currently pursuing a graduate degree at any accredited academic institution in the United States and also living in the United States in an eligible major that supports the mission of AFCEA Educational Foundation.

Anita Borg Systers Pass-It-On (PIO) Awards
The AnitaB.org Systers Pass It On Awards Program honors Anita Borg's desire to create a network of women technologists helping one another. The cash award helps fund women in computing or projects that inspire and support girls and women to enter computing. We encourage recipients to "pass on" the benefits they gain from the award, creating a movement of women helping women. We encourage applications covering a variety of needs and projects including: Assistance with studies, job transfers, or other transitions in life; A broader project that benefits girls and women; Projects that seek to inspire more girls and women to go into the computing field; Assistance with educational fees and materials; Partial funding source for larger scholarship; Partial funding source for technical conferences; and Mentoring and other supportive groups for women in technology or computing.

Department of Energy Office of Science Graduate Student Research (SCGSR) Program
The goal of the Office of Science Graduate Student Research (SCGSR) program is to prepare graduate students for science, technology, engineering, or mathematics (STEM) careers critically important to the DOE Office of Science mission, by providing graduate thesis research opportunities at DOE laboratories. The SCGSR program provides supplemental awards to outstanding U.S. graduate students to pursue part of their graduate thesis research at a DOE laboratory in areas that address scientific challenges central to the Office of Science mission. The research opportunity is expected to advance
the graduate students’ overall doctoral thesis while providing access to the expertise, resources, and capabilities available at the DOE laboratories. We would like to bring to your attention 4 new transdisciplinary research areas for encouraging graduate training activities at the convergence of multiple disciplines and communities, including Microelectronics, Data Science, Fundamental Symmetries, and Accelerator Science. We strongly encourage applications in these areas. The award period for the proposed research project at DOE laboratories may range from 3 to 12 consecutive months.

**Foundation for Food and Agriculture Research (FFAR) Veterinary Student Research Fellowships**

FFAR established the Vet Fellows program to encourage veterinary scientists to improve animal health and welfare, explore the complexities of animal production and enhance human health. This fellowship is a unique opportunity for veterinary students to pursue research related to animal health, global food security and sustainable agriculture. Eligible research topics include animal diseases, sustainable intensification, gene-editing/precision breeding, socioeconomics, spatial analysis and computational modeling, advanced technologies, and epidemiology. The three-month summer fellowship stipend is awarded to a maximum of 10 students annually to conduct research at the intersection of global food security and sustainable animal production with a mentor.

**Marconi Society Paul Baran Young Scholar Award**

The Paul Baran Young Scholar Award recognizes a diverse group of outstanding young scientists and engineers anywhere in the world who have demonstrated exceptional capabilities and potential. Academic faculty and mentors nominate Young Scholars each year. The Young Scholars are a community of scientists dedicated to improving the world by advancing the frontiers of telecommunications and networking. We honor their creative work in the spirit of the boldness and vision exemplified by Nobel Prize winner Guglielmo Marconi. Awardees receive a $4000 cash prize and $1000 in expenses to attend the annual symposium and award recognition dinner.

**National Geographic Society Exploration Grants**
An Exploration Grant application is a request for funding by an experienced project leader in the areas of conservation, education, research, storytelling, and technology. The applicant and his or her team members are expected to demonstrate successful completion of similar projects with measurable and/or tangible results. If you have received a grant from National Geographic in the past, you may submit a new proposal after you have closed your previous grant record. All proposed projects should be bold, innovative, and potentially transformative and have a primary focus in conservation, education, research, storytelling, or technology. Projects should also align to one of our three focus areas: (1) Wildlife, (2) Human Journey, (3) Changing Planet.

**Sigma Xi, The Scientific Research Honor Society Grants-in-Aid of Research (GIAR) Program**

The Sigma Xi Grants in Aid of Research (GIAR) program has provided undergraduate and graduate students with valuable educational experiences since 1922. By encouraging close working relationships between students and mentors, the program promotes scientific excellence and achievement through hands-on learning. The program awards grants of up to $1,000 to students from most areas of the sciences and engineering. Designated funds from the National Academy of Sciences allow for grants of up to $5,000 for astronomy research and $2,500 for vision related research. Students use the funding to pay for travel expenses to and from a research site, or for purchase of non-standard laboratory equipment necessary to complete a specific research project.

**University of Arizona Southwest Climate Adaptation Science Center (SW CASC) Natural Resources Workforce Development (NRWD) Fellowship**

The Southwest Climate Adaptation Science Center (SW CASC) Natural Resources Workforce Development (NRWD) Fellowship was developed to provide graduate students with opportunities for training and practice in developing use-inspired and actionable science to inform natural resource management decisions. The science theme for the 2020-2021 NRWD Fellowship is: Management in the Aftermath of Landscape-Scale Disturbances. One applicant from each partner institution will be selected to take part in each fellowship cohort. Fellows will work as a team to conduct research, and are required to attend monthly cohort teleconferences and two in-person meetings, submit a news item for the SW CASC website, and submit a written report of results and findings. Funding for successful applicants includes a stipend of $5,000, with an
additional travel allowance of $1000 for each Fellows cohort meeting that occurs away from their home campus.

### CDC Epidemiology Elective Program (EEP)

The Centers for Disease Control and Prevention (CDC) seeks medical and veterinary students for the CDC Epidemiology Elective Program (EEP) to applied epidemiology, public health, and global health. Students learn by gaining hands-on experience and mentorship from CDC subject matter experts. This program offers assignments during 6- or 8-week rotation periods largely based at CDC in Atlanta, Georgia. Assignments may involve: conducting surveillance of a disease, injury, or other health condition; analyzing health data to identify new risk factors for disease; assisting CDC’s EIS officers and other public health professionals in the field to investigate an outbreak; and contributing to CDC publications and guidelines of major public health importance.

### John and Polly Sparks Early Career Grant for Psychologists Investigating Serious Emotional Disturbance (SED)

The John and Polly Sparks Early Career Grant supports early career psychologists conducting research in the area of early intervention and treatment for serious emotional disturbance in children. The John and Polly Sparks Foundation partnered with American Psychological Foundation (APF) to empower early career psychologists to produce scientifically-based research and programs that could provide models for broad-based applications across the country. APF will be awarding three grants of up to $20,000 and one grant of up to $19,000. Applicants must be an early career psychologist (no more than 10 years post-doctoral with a degree from an accredited university).

National Endowment for the Humanities Mellon Fellowships for Digital Publication
Through NEH-Mellon Fellowships for Digital Publication, the National Endowment for the Humanities and The Andrew W. Mellon Foundation jointly support individual scholars pursuing research projects that require digital expression and digital publication. To be eligible for this special opportunity, an applicant’s plans for digital publication must be essential to the project’s research goals. That is, the project must be conceived as digital because the nature of the research and the topics being addressed demand presentation beyond traditional print publication. Successful projects will likely incorporate visual, audio, and/or other multimedia materials or flexible reading pathways that could not be included in traditionally published books, as well as an active distribution plan.
- **Deadline:** April 8, 2020 (for projects beginning January 2021)
- **Citizenship:** U.S. citizens and foreign nationals who have been living in the U.S. for at least the three years prior to the application deadline.

National Endowment for the Humanities Postdoctoral Fellowships

The National Endowment for the Humanities, a federal agency in Washington, D.C., administers a fellowships program that provides financial support for individuals who wish to pursue scholarly research projects in the humanities. Projects should involve advanced research that is of value to scholars, general audiences, or both. Fellowships provide recipients time to conduct research or to produce books, monographs, peer-reviewed articles, e-books, digital materials, translations with annotations or a critical apparatus, or critical editions resulting from previous research. Projects may be at any stage of development. NEH invites research applications from scholars in all disciplines, and it encourages submissions from independent scholars and junior scholars.

- **Deadline:** April 8, 2020 (for projects beginning January 2021)
- **Citizenship:** U.S. citizens and foreign nationals who have been living in the U.S. for at least the three years prior to the application deadline.

Oak Ridge Institute for Science and Education List of Postdocs in National Labs and Federal Research Facilities

If you are a recent doctoral graduate and would like to obtain additional training within your field of study, the Oak Ridge Institute for Science and Education (ORISE) offers postdoctoral fellowships and research opportunities at national laboratories and federal research facilities nationwide. For scientists who have recently completed their Ph.D. in a science-related discipline, a postdoc research fellowship can make an excellent start to a career at a DOE national laboratory or other federal research facility. ORISE sponsors postdoctoral research programs across the United States, many of which have immediate openings for qualified candidates.

Society for the Psychological Study of Social Issues (SPSSI) Graduate and Postdoctoral Grants-in-Aid Program

The SPSSI Committee on Grants-in-Aid (GIA) wishes to support scientific research in social problem areas related to the basic interests and goals of SPSSI and particularly those that are not likely to receive support from traditional sources. The Committee especially encourages proposals involving (a) unique and timely research opportunities, (b) underrepresented institutions, graduate students, and junior scholars, (c) volunteer research teams, and (d) actual, not pilot, projects. Funding up to $1000 is available for graduate student research. In the case of graduate students, strong preference is given to applications from students at the dissertation stage of their career. Funding up to
$2000 is available for research by SPSSI members who already have a Ph.D. Applicants can be at any stage of their academic work at any type of institution.

**Thrasher Research Fund Early Career Award Program**

The Fund recognizes that young investigators may find it difficult to remain in pediatric research because of a lack of funding. Therefore, the purpose of this program is to encourage the development of medical research in child health by awarding small grants to new researchers, helping them gain a foothold in this important area. The goal is to fund applicants who will go on to be independent investigators. The Fund is open to a wide variety of research topics. In the Early Career Award Program, the Fund is particularly interested in applicants that show great potential to impact that field of children’s health through medical research.
